卷五十一 “11人の超新星”

尾田栄一郎

EIICHIRO ODA

I've heard that some swimmers grow webbing between their fingers in order to be able to paddle harder. That's evolution. I'm always drawing manga, so I want to evolve somehow too. Like...having my fingernail become a pen tip. Or being able to see through the clothes of women on the street. And now, on with volume 51!!!

-Eiichiro Oda, 2008

Eiichiro Oda began his manga career at the age of 17, when his one-shot cowboy manga **Wanted!** won second place in the coveted Tezuka manga awards. Oda went on to work as an assistant to some of the biggest manga artists in the industry, including Nobuhiro Watsuki, before winning the Hop Step Award for new artists. His pirate adventure **One Piece**, which debuted in **Weekly Shonen Jump** in 1997, quickly became one of the most popular manga in Japan.

Q: Nice to meet you, Odacchi! I've got a question. Somewhere around volume 46, Brook said, "If my tears had not already dried," but then in volume 50 he was crying tears like normal. Why?

--Kyo-chan

A: That's because even if your tears of sadness dry up, tears of happiness never dry up. Why? Because people...are kind.

All right, moving on (← Said in a low, dignified voice.)

Q: I'll be Moria's replacement!

--Small Onion

A: All right, moving on (← Said in a low, dignified voice.)

Q: Odacchi!! Hello! ☆ I'm a bright and healthy 14-year-old girl! ♥ I'd like to ask you—someone I greatly respect—a question! There are compound words made of four kanji, aren't there? (Did you know that?) If you were to describe the Straw Hats in a four-kanji compound word, what would it be?! *Ishinden-shin* (telepathy)? *Juunintoiro* (it takes all kinds)? Oh, I know!! *Yakiniku teishoku* (barbecue set lunch)?

--Gachapin's Cousin ♥

A: Do I know four-kanji compounds? Of course I do! 3 My favorites include *jakakuhakken* (snake and crane arts of Shaolin), *shorin soccer* (Shaolin soccer) and *kuro oolong cha* (Black oolong tea)!* Oh, you want one that expresses the spirit of the Straw Hat crew? It's gotta be *zendaimimon* (unprecedented). They were called that during the events at Enies LOBBY. I always want them to be unconventional.

**Snake and Crane Arts of Shaolin* and *Shaolin Soccer* are both movies.--Ed.

Q: Marry me!

--Man

A: No! (← Said in a low, dignified voice.)

ONE PIECE!!	Luffy
Zolo	Sanji
Nami	Usopp
Franky	Chopper
Robin	Brook

What power of representation! Chopper and Robin are Brilliant. I applaud you!

Q: When the crew is at sea, who takes care of the laundry, which is almost as important as meals? Nami doesn't seem the type (sorry). And if Sanji did it, he would be distracted by the lingerie! Yow! ♥

A: The laundry? As you can imagine, Sanji certainly wouldn't do it all himself, of course. The guys and girls split up. The two girls change clothes every day, so they take turns doing the laundry every day. The seven guys do laundry once a week, doing a Big wash-a-thon together. They don't change clothes all that often, so that's enough. Right, Chopper?

Chopper: Yeah, they're really smelly!! Everyone's dirty!

Q: Odacchi, something good's gonna happen! 🍊👍 Thumbs up.

--From Low-Ranking God of Happiness

A: Seriously?! I'm so happy! I wonder what it is. Will racy magazines fall from the sky? Ugh... (← depressed at how small I think)

Q: If Captain Lola is so cool, why have 4,444 of her engagements been broken off? Is there a reason?

--Akie Brand

A: Well, on top of her incredible presence...she tries too hard. Someday she'll find happiness. (Not that it's any of my business.)

Q: Hello, Oda Sensei. In volume 50, chapter 490, there was a circular rainbow. The other day I saw one in our school courtyard. How does that happen? Please show me brilliantly! Hee hee hee!

--Old Cloth

A: That's amazing. You can't see circular rainbows on the earth's surface except in the rarest of circumstances. But it's true, circular rainbows really do exist. I drew one in that panel. Actually, all rainbows are basically circular.

← This may be a little hard to understand, but rainbows occur when sunlight reflects off water droplets, and the light is broken down. A rainbow won't appear unless the sunlight, water droplets and the position of an observer appear as in the diagram on the left. It seems the angle of the reflection of light off the water droplets has to be 42 degrees, so for people on land, the bottom half of the circle falls below the horizon. Thus, the circular rainbow seen from the sea in the manga is

not a common occurrence. I thought it might be all right, however, since the Straw Hats were on the Grand Line. I learned about this phenomenon when a manga colleague of mine saw a circular rainbow from inside an airplane. Theoretically, you can see them if you are in the air. But you can see them above a school courtyard too?! And what is this, a science textbook?! This is a broadcast of the stupid manga One Piece. Don't change the channel!

Q: Odacchi! Odacchi! Is your uncle a taxi driver? When I went to Kyoto, this man gave me a *One Piece* poster and a copy of the cover of volume 6! I've been wondering about him so much I can't study for my entrance exams! ♡

—Jana

A: Oh, that was most likely my uncle. He said he was doing that: "Ei-chan, I always promote your manga." The company had to ask him to tone it down, but he's still cruising around Kyoto somewhere. If you end up in the taxi with tell him I said hi.

Q: Did you have *The Addams Family* and *The Nightmare Before Christmas* in mind when you wrote the Thriller Bark arc? I like that kind of atmosphere.

—Cindry, Who Likes Plates

A: You mean the movies, don't you? I like movies like that too. I had to force myself to watch a lot of zombie movies. I basically don't like anything scary. Even though I used more black than usual to get the right atmosphere in the drawings, I was aiming for bright, fun zombies. Whenever manga creators write on topics that might bring bad luck, like ghosts and dead people, they go to a shrine to be blessed--and I did the same! I'm super scared of curses.

Q: Oda Sensei, I have something to tell you! The design for Franky's skull and crossbones on page 166 in volume 47 was different than in the pamphlet for the movie *Episode of Chopper*.

—Cola with Lemon

© Eiichiro Oda/SHUEISHA Inc., Fuji Television, Toei Animation

A: You noticed...? I noticed after the fact. Before I drew the manga, someone from Toei Animation had submitted a design for Franky's symbol for my approval. I completely forgot that I had okayed it and ended up making another design. Well, they're both Franky's symbols. It's all right if he has two!

BACKGROUND READS "HANDSOME."

Q: Hello, Oda Sensei! For more than ten years you've kept me on the edge of my seat, biting my fingernails, and now I've got a question for you. In Chapter 501: The World Begins to Swell, at the bottom of the price list, where it lists mermaids, it says "bifurcated." Does that mean a mermaid who dates two different guys at the same time? I'm so worried about it, I can't get a girlfriend.

--Kinta

A: Yes, that's right. A two-timing mermaid who plays around with two different men sells for a lower price! Or so it seems. That's the way it goes. **NOT!** In volume 44, chapter 424, Kokoro explains it, saying "At thirty, the prime of a mermaid's life, her tailfin splits in two so she can live on land." That's all there is to it. Young mermaids like Camie sell for a higher price. Maybe I should devote some space in the manga to explaining the biology of mermaids in greater detail.

Q: Sometimes Kuma has trouble saying he is a Paw-Paw Man who ate the Paw-Paw Fruit. He does, doesn't he?*

--Tomo-san

*In Japanese, "Paw-Paw" is "Nikyu-Nikyu." In other words, a real tongue-twister!--Ed.

A: No, he doesn't! He's one of the Seven Warlords of the Sea! Right, Kuma? All right, let's have the man himself say it three times fast! Take it away!

Kuma: Pah-paw...

より多くの水をかける様に
水泳選手の手の指の間にはヒレができる
という話を聞きました。進化だそりや。
漫画家も、ずっと絵を描いてるんだから
何らかの進化を遂げたいところだ。
例えば……ツメの形が
ペン先の様になるとか。
道ゆく女の人の服が
透けて見える様になるとか。
51巻、始まるよー!!!
